

## PG-xH12JS Pistol Grip Remotes

### Features

- ✓ PG-9H12JS 900MHz@10mW/ PG-2H12JS 2.4GHz@100mW/ RF Power License-Free Operation
- ✓ Direct Sequence Spread Spectrum Technology
- ✓ Three 3-Position Toggles      ✓ Two Dual Axis Joysticks
- ✓ Dedicated M-Stop Button      ✓ Four Status/Diagnostic LEDs
- ✓ Glove-Accessible Switches      ✓ Four Handle-Embedded Magnets
- ✓ Umbilical Connection Option      ✓ J1939 CAN Capable
- ✓ Powered by 4-AA Alkaline Batteries
- ✓ Comfortable Weatherproof Pistol Grip Design

The SmaRT™ PG-xH12JS pistol grip remotes are designed for traditional and non-traditional mobile applications. Capable of activating digital and joystick trigger-control-pulse-width-modulated proportional outputs of SmaRT base units, the PG-xH12JS provides single-handed operation in a comfortable layout. Using direct sequence spread spectrum (DSSS) wireless technology at 900MHz or 2.4GHz, the SmaRT pistol grip remote provides a robust link with SmaRT base units in congested radio environments. The SmaRT PG-xH12JS features seamless association to a SmaRT base unit without the need to open the case of either unit. The umbilical option allows a PG-xH12JS remote to directly connect to base units.

The rugged weatherproof Pistol Grip enclosure allows the unit to operate worry free in harsh weather conditions. Four handle-embedded magnets allow the remote to be securely attached to ferrous surfaces to help prevent misplacing the unit while not in use.

### Specifications

#### Power

<b>V<sub>in</sub></b>	+3.0VDC nominal
<b>Batteries</b>	Four AA Alkaline
<b>Battery Life</b>	≅175 to 200 hours
<b>Low V Power Down</b>	1.6 VDC
<b>Auto-Power Down</b>	10 minutes of inactivity (default)

#### Radio

<b>Frequency</b>	906–924MHz; 2405–2480MHz
<b>RF Power</b>	10mW @ 900MHz; 100mW @ 2.4GHz
<b>License</b>	License Free
<b>Modulation</b>	DSSS
<b>Antenna</b>	Internal

#### Environment

<b>Operating Temp</b>	-20°C to 55°C (-4°F to 131°F)
<b>Storage Temp</b>	-40°C to 55°C (-40°F to 131°F)
<b>Humidity</b>	0 to 100%

#### Controls

<b>Switches</b>	Three 3-position toggles, two dual axis joysticks One trigger (proportional controller) One oversized stop
-----------------	--

#### Indicators (4 LEDs)

##### TX (Green)

Blinking	Transmitting messages
Steady	Switch active

##### RX (Amber)

Blinking	Receiving messages
Steady	Output of interest active

##### Error (Red)

Steady	Error detected; switch conflict
Flashing	Switch conflict, switch held by user when turned on

##### Battery (Amber)

Flashing	Low battery indication
----------	------------------------

#### Enclosure

<b>Dimensions</b>	mm: 230.59x133.93x146.92 inch: 9.08 x 5.27 x 5.78
-------------------	--

<b>Weight</b>	1.22kg (2.7lbs)
---------------	-----------------

<b>Durability</b>	High Impact Polymer
-------------------	---------------------

## Associate Mode

All Cervis systems are associated (communications are pre-set) at the factory. However, a SmaRT PG-xH12JS can be associated to a SmaRT base unit in the field when desired.

To associate there must be a clear line-of-sight between the handheld and the base unit, and both units must be OFF (powered down). Do not operate the trigger while associating.

1. Stand near to the base unit in a clear direct line-of-sight with the handheld while both handheld and base unit are **OFF**.
2. Release the MACHINE STOP, move any switch to its maximum position and then allow it to return to its neutral position. This activates the handheld making it ready for use.
3. Hold SW1 in the UP (Associate) position.
4. Hold SW3 in the UP position.

All four LEDs will flash once, TX (transmit) lights steady, and RX, ER, and Battery go out.

5. Continue to hold SW1 and SW3.
6. Power Up the base unit.
7. Release SW1 and SW3.

Handheld and base unit association is complete when TX and RX continue to blink (flicker) while the handheld and base unit are active (on) indicating the communication link is established.

## PG-xH12JS Family

All PG-xH12JS handheld remotes use four AA alkaline batteries for power and have four handle-embedded magnets. The following table defines various features applicable to the models listed.

Model Name	Freq.	RF Power	Umbilical	CAN Capable	Dedicated Stop	Joysticks (X and Y Axis)	Proportional Trigger Control	Toggle Switches
PG-9H12JS	900MHz	10mW	No	No	Yes	Yes	Yes	Three 3-position
PG-9H12JS-UMB	900MHz	10mW	Yes	Yes	Yes	Yes	Yes	Three 3-position
PG-2H12JS	2.4GHz	100mW	No	No	Yes	Yes	Yes	Three 3-position
PG-2H12JS-UMB	2.4GHz	100mW	Yes	Yes	Yes	Yes	Yes	Three 3-position
